

Halkshill and Blairpark

18.06.19

Over the last two weeks at Halkshill and Blairpark the first trees have gone into the ground on the top of Rigging Hill. The trees planted in this area to date are Sitka Spruce and Lodgepole Pine. These trees are planted on mounds and plough lines which provide a weed free advantageous area for the tree to establish.

We continue to mark out the site for further ground preparation with the use of canes and tapes to buffer important features such as watercourses, archaeological features and any ground nesting birds.
